

Are you tired of real cafes,
cluttering the streets and
sending you real food when
you order from them?

REAL FAKE CAFE

Client: Sainsburys Data Academy

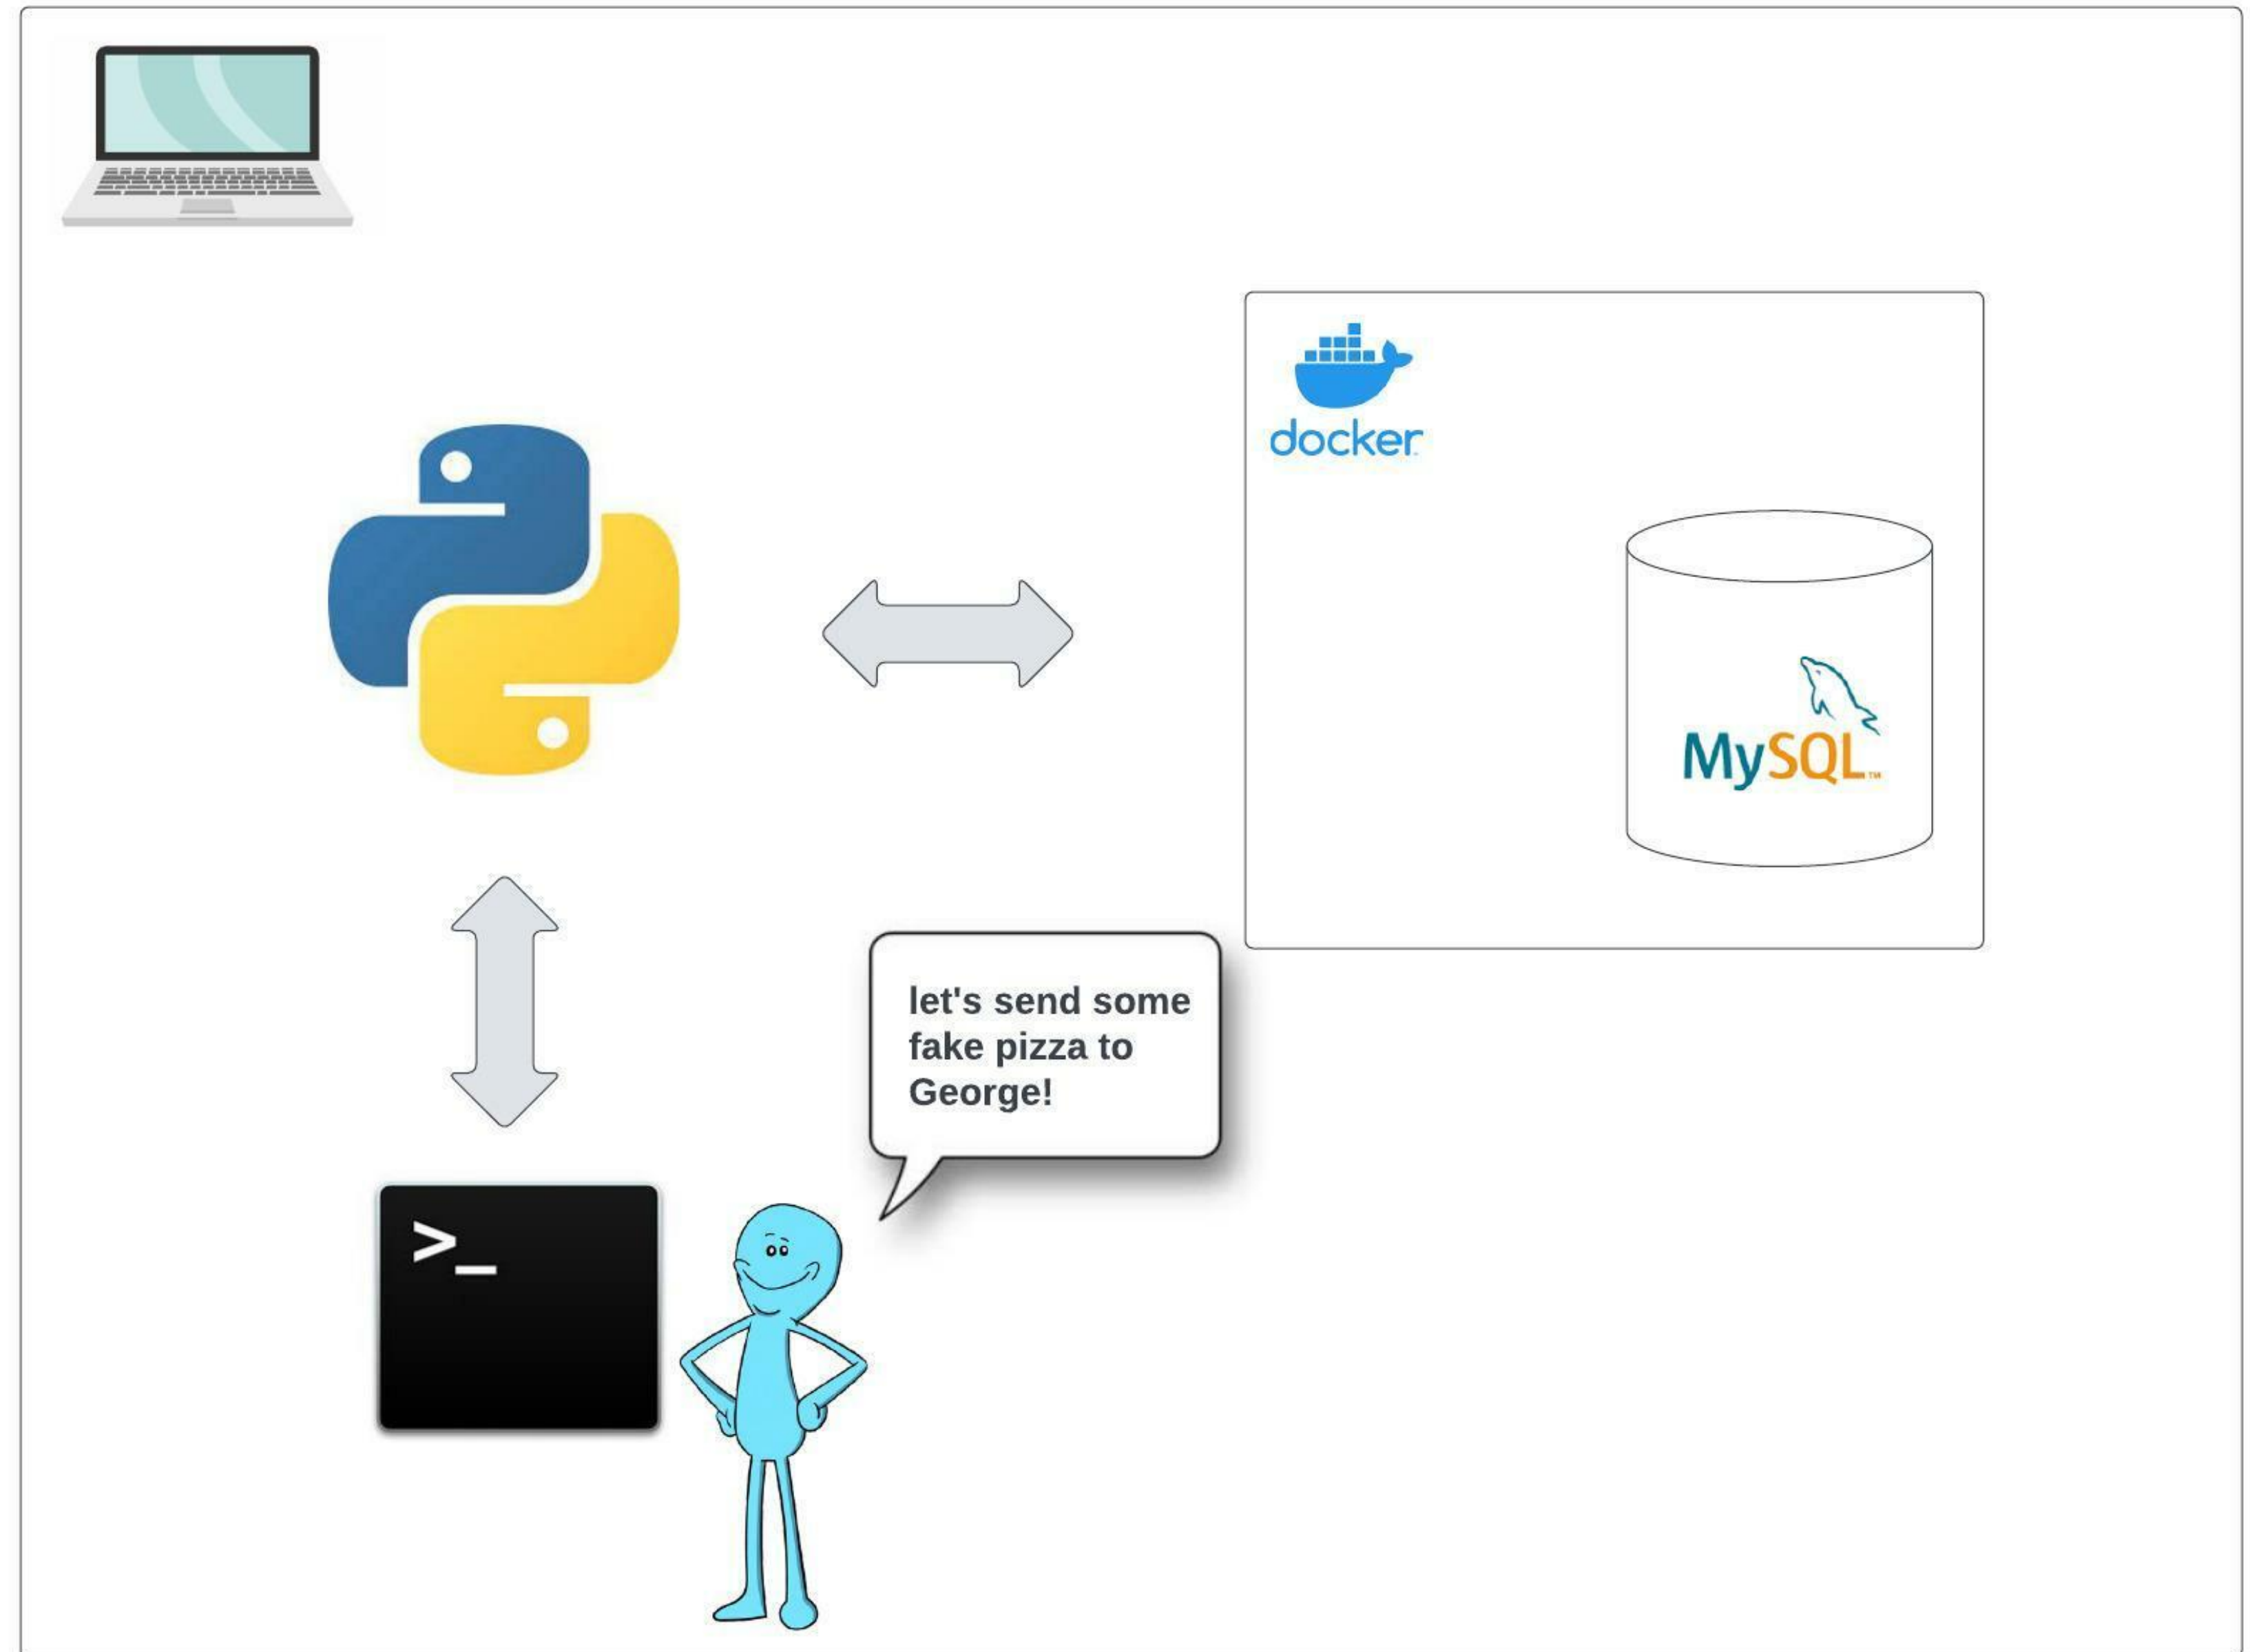

The challenge

Create software application which helps a cafe to log and track orders, its requirements:

- Maintains a collection of products, couriers and orders.
- Customer should be able to add/remove products, couriers and orders.
- Data should be stored in a database.
- Software needs to be able to receive regular updates.

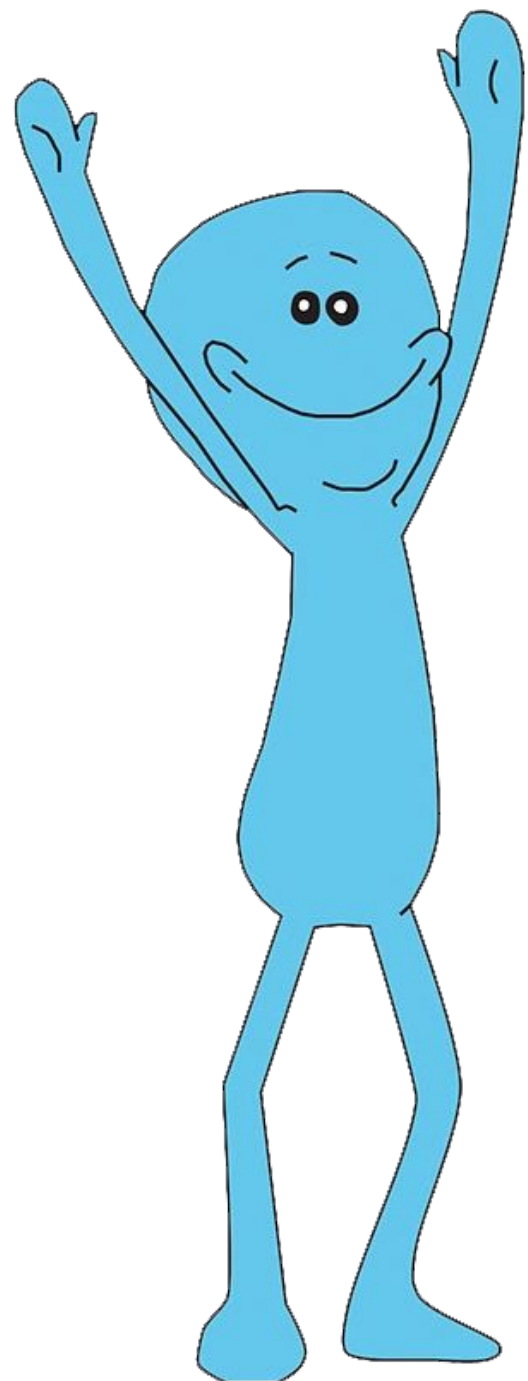

Architecture

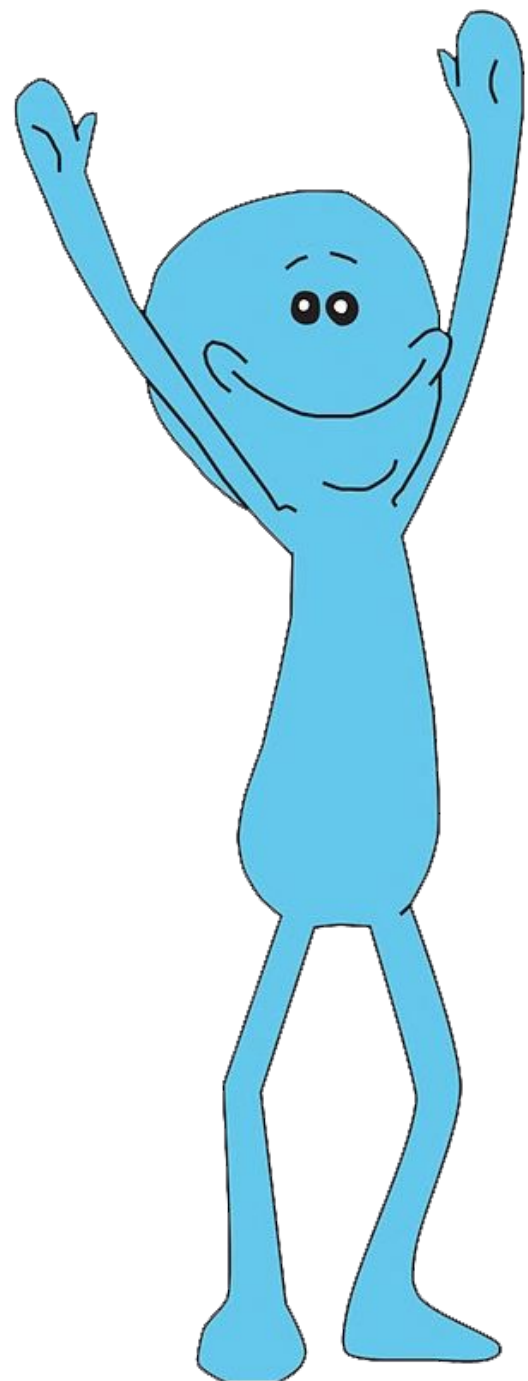

Demo

What I loved

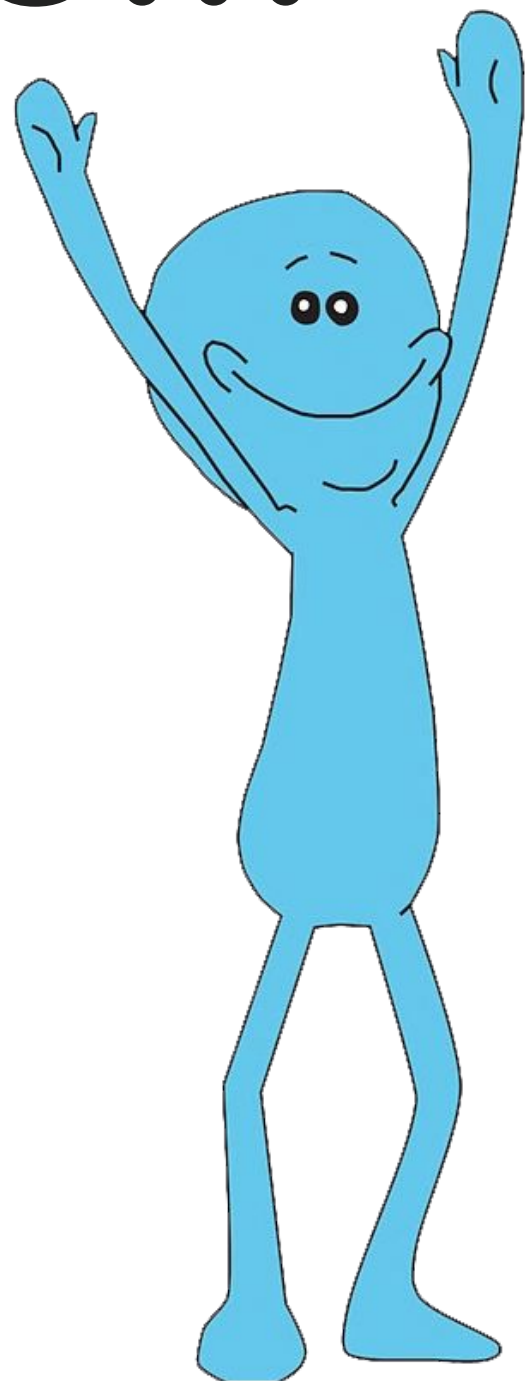

- ✓ The team
- ✓ The product
- ✓ Pairing
- ✓ Volume of learning

What I learnt

- ✓ Python
- ✓ Testing & DI
- ✓ Docker
- ✓ Database
- ✓ Git

If I had more time...

- ☐ More Testing
- ☐ Containerising App
- ☐ Better UI (colour, ...)

Thank You
